Morning Brian,

We have had no issues from flooding at the facility. My team reported no issues this morning from the weekend's rains.

I will be onsite tomorrow and can send a follow up, but we monitor our dike system during weather events and we have found no issues.

My team also reported no issues from the tanks or other areas of the plant. The team inspects the area per a GLO inspection form we complete monthly.

Scott

Scott

Can you please send me an update on the possible impacts from flooding at the Falcon Site.

Thank You,

Brian W. Mueller

Hello,

We have had no flooding or any other issues associated with the rain fall further north in Texas.

My team reported some rain from the passing storms, but nothing significant.

Thanks,
Scott

Good afternoon Jonathon

I am the Remedial Project Manager for the Falcon Refinery Site. EPA needs confirmation that the facility is secured for the ongoing flooding in your area. Please indicate the actions being taken to secure the facility to prevent a release of any product into the environment. Please reply back to me and Gary Moore about the status of the Site as soon as possible.

Thank You,

Brian W. Mueller
Remedial Project Manager
